

TRANSPORTATION DEMAND MANAGEMENT TECHNICAL COMMITTEE BY-LAWS

ARTICLE I

PURPOSE

The composition of the Transportation Demand Management (TDM) Technical Committee (formerly the Commute Trip Reduction Board) is established in statute to represent government and private organizations charged with implementing the state's transportation demand management program. The purpose of the TDM Technical Committee is to oversee implementation of the program and to identify ways to increase the program effectiveness at the state, regional and local level.

The former Commute Trip Reduction Board approved a new governance structure in late 2018, creating the TDM Technical Committee and TDM Executive Board. These by-laws apply to the TDM Technical Committee only.

The TDM Technical Committee establishes processes, criteria, and procedures for implementing the program. It approves local and regional plans and develops a statewide TDM plan. It establishes guidelines to ensure consistency between local commute trip reduction plans, Growth and Transportation Efficiency Center (GTEC) programs, and other transportation demand management strategies. The Committee allocates state funding to support the program and recommends changes to transportation policies and funding priorities at the state, regional and local levels.
