

Survey Requirement: one-time exemption

Action: TDM Technical Committee decision

WSDOT Recommendation: For jurisdictions that have yet to survey in the current biennium, exempt them from the CTR survey and program report requirements. This exemption would expire at the end of the biennium. Jurisdictions that wish to survey would not pursue the exemption.

Background for recommendation:

- The TDM Technical Committee determines the standards of RCW compliance, which includes annual performance measurement.
- Data will baseline at end of biennium (June 30, 2023).
- Jurisdictions that lack resources would require training for obsolete software.
- Data collected in the current biennium will not be recorded for next biennium.
- Exemption does not impact jurisdictions which already completed surveys to advance local programming objectives (example: CTR Champion's programs)

Survey Requirement: one-time exemption

Engagement:

WSDOT polled 13 jurisdictions (that have not surveyed) whether they would pursue an exemption if given the option.

- 9 would pursue an exemption.
- 1 would not pursue the exemption.
- Remainder did not answer or undecided.
